① What are our attitudes towards Organizations?

1. Organizations teach us to fight France, Japan. If we do not fight France - Japan, our people will die. If we want to live, to have freedom and happiness, we must fight France - Japan. But without organizations, how can our people fight France - Japan. There is a saying: "Nothing can be done without teachers".

Organizations are the teachers of our people, showing us the way to get out of the oppression and exploitation of France - Japan and get on the way of freedom and happiness.

2. Parents have given birth to us, we will never forget that merit. Organizations have rescued us from death, we will also never forget that merit either. To repay the merit of parents, we must love and respect our parents. To repay the merit of the organizations we must respect and love them too. In addition we must comply with the organizations, remain faithful to and sacrifice and work enthusiastically for the organizations.

3. Our organizations deserve our love and respect and compliance because they consist of thousand of resourceful persons who are concerned all the time with fighting the enemy to save the country. Throughout our country, from the south to the north, the organizations always dispatch their members to help the people to unite. To those members we must love, respect and comply with them, because these persons have had to leave their homes, their families, their work, to pass through mountains and streams, to suffer from numerous hardships for the sake of the organizations and for our happiness.

Love and respect to the organizations mean love and respect to the organizations' cadres who are assigned to <sup>our</sup> localities.

② Welcoming the all-province conference of self-defence trainers.

Recently the all-province conference of self-defence trainers has taken place with the attendance of representatives of the province committee and comrade V.G. There were 16 participants and the conference lasted for 6 days, adopting a resolution on a number of important matters such as:

- 1) Unanimity in self-defence training: ordinary self-defence and combat self-defence.
- 2) Attention to combat.
- 3) Regulations of the combat self-defence units and the training program of the combat self-defence units.
- 4) Regulation of the scorched-earth plan (there will be particular communique distributed to communes)

~~Now is the time to present we are preparing~~ Now is the time for us to prepare for armed insurrection. The problem of self-defence is the most important problem. But in order to improve the organization and implementation of the self-defence task we must remember 2 things: firstly, the members are enthusiastic about joining the ordinary and combat self-defence units. Secondly, the self-defence trainers must strictly follow the prescribed plan on one side, and think of new initiatives on the other side to improve the self-defence training, say, the regular training of the guerrilla combat tactic.

③ Domestic News

- 1. France now does not have rice to provide its soldiers, so the soldiers have to eat maize. But they even maize is difficult to get. The soldiers said they very much wanted to rebel and fight the imperialists, but did not know whether the organizations have permitted.
- 2. France ordered village notables to arrest the clandestine persons because France knows that our organizations were going to fight France-Japan.

④ World News

1) Britain and America have managed to occupy 3 small islands near Italy. At the same time the British and American planes were destroying ~~the~~ Italy's cities.

2) A news from Japan said that this summer German is not going to attack Russia, but maintain its forces to deal with the offensives of Britain, America and Russia. If it is true, German has not much strength now.
