① Russia Wins the War and the world revolutionary movement

1. A few months ago the newspaper V. N. D. L carried an article about the victory of the Red Army. From then on Russia has been winning, and Germany has been losing and retreating, especially in the last 3 months. Germany's sources themselves confirm that the Red Army wins over Germany everyday on all fronts from the south to the north. By now the Red Army has been very close to the border and with this speed, it will not be long before the Red Army drives away all German troops out of Russia.

The final victory of the Red Army is undoubtful and will come soon. Everyone in the world is longing for that victorious day!

2. Russia's victory will greatly help the revolutionary movement in the German-occupied countries. For a long time the peoples of those countries have been uniting and preparing for armed insurrection which will be carried out when there is opportunity. Russia's victory and Germany's defeat will be such a opportunity. Therefore at present the revolutionary movement in those countries is very vigorous, and in many places the guerrilla groups have stood up to expel the German forces and recaptured many major cities, as in Yugoslavia. If the Red Army makes one step forward, Germany makes one step backward then the movement of armed insurrection in the German-occupied countries will make a step forward. Then in a near future the Red Army will meet the guerrilla units of those countries, thus facilitating the conditions for the revolution of those countries.

3. Russia's victory over Germany <sup>will</sup> not only help the

world revolutionary movement, but also help the capitalist countries, especially Britain and America, to fight Germany. Therefore, those countries must be admiring Russia and will discuss everything with Russia. Judging by that scenario, Russia is the most powerful country in the world, and the world revolution can rely on that strength.
